DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to an electronic brush, classified in class 607, subclass 79.
- II. Claims 15-21, drawn to a hairbrush having a discharge electrode, classified in class 132, subclass 271.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as a needle electrode and the ground electrode. The subcombination has separate utility and does not require to have the base having an opening defined for passage of the ions and some of the bristles around the opening in the brush base are removed to provide a plain surface area where no bristle exist.
